

AcryliCon Polymers GmbH

Unser Unternehmen

AcryliCon ist ein Hersteller und weltweiter Verleger von langlebigen, hygienischen, leicht zu reinigenden, rutschfesten und pflegeleichten Harzbodensystemen.

Auf einer Gesamtfläche von 4800 m² produzieren wir unser einzigartiges Kunstharz auf höchstem Qualitätsniveau. Für die kontinuierliche Weiterentwicklung unserer Produkte sorgt unter anderem unser hauseigenes Labor.

Standorte

Standorte

AcryliCon verfügt über lizenzierte Händler und geschulte Auftragnehmer auf der ganzen Welt. AcryliCon-Unternehmen sind wirtschaftlich und rechtlich unabhängig. Jedes Unternehmen hat sein eigenes System und seine eigene Struktur. Im Jahr 2014 wurde eine eigene moderne Produktionsstätte von AcryliCon in Deutschland (Neustadt-Glewe) mit derzeit 20 Mitarbeitern gegründet.

Hier werden die Harze sowie alle Komponenten für unsere Acrylicon-Bodensysteme hergestellt. Diese Harze werden an alle unsere internen Partner geliefert.

OUR HISTORY - AcryliCon milestones

1977

1990

2014

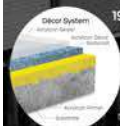

Designed in Scandinavia...manufactured in Germany...installed locally worldwide!

1995 | AcryliCon goes Global.

As our solutions gained in popularity across Scandinavia, several multinational clients wanted the same standard of flooring across their facilities world-wide. UK, USA, Canada, Egyptian and Middle East offices were established as a result of this customer need. We continue to expand globally to this day.

2022 | A Resin Solution Company

AcryliCon continually listens to our customer's needs and needs, manufacturing and installing systems that offer long-lasting solutions. We aim to make these solutions as high quality, environmentally friendly and sustainable as possible. Utilising our experience and expertise, we are able to offer customers solutions to other areas of their businesses. Along with Flooring, we now provide solutions for - Walls, External Waterproofing, Fast-cure screeds, Drainage, Commercial Flooring and Repair Mortars. Our new logo reflects this - AcryliCon Quality Resin Solutions.

1977 | AcryliCon Born from Customer Need

In the 1970s, Food manufacturing industries were struggling to find a flooring solution that matched all their needs. Studies showed that the ideal floor should be - nice looking, hygienic, easy to clean, easy to install and maintain, slip resistant AND long lasting.

AcryliCon was founded in 1977 to create a system which would meet or exceed these requirements. After several years of research, the AcryliCon Decor System was born.

1978

1978 | First Installations

One of our first installations, a 4000sq ft kitchen in St Olav's Hospital, Trondheim, was installed in 1978. It remained fully operational until the building was demolished in 2010 - 32 years later. Picture taken August 2009.

1990 | AcryliCon develops new Solutions.

Having gained a solid reputation within the food industry, AcryliCon gained enquiries from many other business sectors - retail, offshore, engineering, logistics and many more. By listening to and understanding these customer's needs we developed several new solutions for them - Variant, Flake, Lacquer and the world-renowned Industry System. By 1990, AcryliCon had the vision to become a solutions provider in the industrial flooring market.

1995

2014 | New World-Class Resin Production Facility

The creation of our modern production facility in Germany allowed us to increase our production capacity and quality, supporting the growing global market. It also houses our R+D laboratory, where we can further develop innovative products and solutions.

2022

- 
- 1977 gegründet von Bjørn Hegstad in Norwegen
 - Von bescheidenen Anfängen zu einem internationalen Unternehmen mit einer Vielzahl von Installationen auf der ganzen Welt
 - seit 2014: Acrylicon hat eine Fabrik in Neustadt-Glewe gebaut und produziert die Harze für die Partner weltweit
